UL's Workplace Health and Safety course library offers self-paced training that is engaging, consistent and measurable. You and your trainees can access or manage training 24/7 from virtually any Internet-connected computer. All courses are developed by a team of certified safety professionals and adult learning experts, and are continuously updated to address compliance requirements. The in-house Professional Learning Services team maximizes employee learning and retention with rich multimedia features including:

- High-quality course narration and text
- Superior high-resolution graphics, 3D animation and illustrations
- Challenging learning activities, knowledge checks and post-tests to reinforce and evaluate employee knowledge
- Intuitive course navigation and bookmarking

UL's flexible delivery and pricing fit any environment, workflow or budget, and our Course Licensing options allow you to run content on your learning management or enterprise software system.

All of UL's Workplace Health and Safety courses conform to AICC and SCORM 1.2 requirements.

Interactive Online Training Programs »

This defensive driving program has been designed to address a fleet's top crash causes. Each lesson targets common errors made every day by drivers on our roadways.

Each module is designed to take only 15-20 minutes to complete and consists of four easy to follow steps:

Step 1

The first step is an interactive slide show that the driver goes through at their own pace beginning with the learning objectives for the module.

Step 2

The second step visually depicts the scope of the problem. This may appear in the form of a chart or a graph.

Step 3

The third step is a full-motion, streaming video, which loads in the background while the driver is going through the first two steps.

Step 4

Finally, the driver goes through a 10 question quiz based on the module they've just been through. Each question is taken from a pool of more than 20, ensuring that each quiz is unique.

All AlertDriving modules follow the 4-Step process outlined above.
